

GENERAL ENVIRONMENTAL POLICY STATEMENT

Benchmark Scaffolding is committed to protecting the environment, natural resources and the health of employees. Top Managements commitment extends to the incorporation of sound environmental practices in our business decision-making process.

Accordingly the Company will:

1. Comply with the Environmental Protection Act and other legislation and permits and will set more stringent standards where we believe them to be appropriate.
2. Assess and endeavour to reduce the adverse environmental impact of all activities, contracts and projects.
3. Identify, examine and evaluate the significant environmental effects of our activities at each operating site, where applicable.
4. Reduce and where reasonably practicable, prevent adverse environmental effects.
5. Conserve energy and other natural resources wherever reasonably practicable.
6. Minimise the risk of adverse environmental events, commercial loss, name and Reputation. Maintain a robust system of reporting and response.
7. Encourage and promote best practice of environmental performance in the scaffolding industry.
8. Extend the life cycle of steel, timber and other equipment by reduction, reuse or recycling.
9. Encourage the contributions every employee makes towards improving the Company's environmental performance.
10. Invest in cost effective energy efficiency and conservation.
11. Strive to prevent any emissions or effluents, which may cause pollution damage.
12. Encourage the use of products through the supply chain which promote sustainability.
13. Provide adequate resources to meet the requirements of this policy and continually strive for improvement.
14. Ensure this Policy be made available to relevant interested parties, as appropriate.

AIM; to protect the environment in which we work

1. Objectives

-  Provide facilities, plant and equipment which have been properly designed, engineered, constructed and maintained in order to minimise pollution.
-  Comply with all applicable statutory obligations concerning the environment.
-  Provide adequate information, instruction, training and supervision so that employees may work in an environmentally aware manner.
-  Develop an environmentally aware culture throughout the company.
-  Provide competent advice to all levels of management on environmental matters concerning the company's operations.
-  Monitor and measure environmental related performances against predetermined targets and objectives.
-  Continual improvement by the promotion of adverse environment events prevention programmes with defined targets.
-  Source timber and similar products from suppliers with nationally recognised sustainability certification.

2. Organisation and Responsibilities

2.1 Managing Director

The Managing Director is responsible for ensuring:

-  An effective policy for the protection of the environment exists is implemented and is reviewed annually.
-  Environmental matters are given due attention by the board of directors.
